

Claims (5 - 8) ARE CANCELED

(Canceled) Claim 5) A method of playing a sport, entitled Dictionary Dazzle, on a portable surface of molded Canvex measuring 85 feet by 54 feet, for semi contact indoor play or areas 45 yards by 110 yards measured off outdoors; of which playing areas contain

- a. circles design centered one within another having a diameter measuring 35 feet and 24 feet placed to the center of the Canvex for indoor play,
- b. having diameters measuring 88 feet by 38 feet, placed toward one end of the play area for outdoors, played by 3 five man teams competing together in a single contest on the Canvex surface indoors,
- c. when played outdoor, 5, 4, 3 or 2 five man teams compete at once in a single contest on an area that measures 45 yards by 110 yards, in which contest are started by
- d. teams lining-up staggered around the outside or outer circle with an opponent to their front and rear with an official or a person acting as referee tosses a die to determine the order of offense or flip a coin if only two teams playing, once the offense has been determined,
- e. the referee starts the action by impelling an elongated molded diamond shaped object called the horizontal, that measures 18 1/4" overall in length by 6 1/2" abreast where widest and 1 3/4" in depth, that's covered with 1/4 inch cloth inserted neoprene rubber, hand covered and stitched at the seams, at least one full revolution, that is centered and anchored inside the inner circle,
- f. which starts the clocks and signals the player designated as the first spinner to begin attempting to make their way into the inner circle, while the defense tries to stop their progress by bumping, tossing, holding and blocking the spinner, the offense gives help to their teammate by bumping, tossing, holding and blocking the defense out of the designated spinner's path, and
- g. a total of 40 seconds is allowed for the spinner to attempt the spin and if the spinner does make their way into where the horizontal is, touching it or the mount that it is connected thereto, one of the two outs an offensive teams receives in order to score is taken away and,
- h. all offensive players except the spinner have a predetermined period of time (3 seconds)

once they enter into the inner circle for indoor play and 5 seconds for outdoor play, they can remain in there before leaving and a lost of one down is the penalty for the infraction,

- i. if the spinner moves the horizontal one full revolution, without it landing on any hash-mark of the instructions, on the surface printed below the horizontal or any category that does not allow a lifting attempt to score or further a score, he scores one point if playing indoors and is given a chance to further the score by telling the official how much weight he will attempt to lift, with one continuous flick of the wrist using the Dazzle Bar and increase his side's score by a multiple of the category contained within the instructions of the category below where, the horizontal landed; and if in outdoor play;
- j. a spinner wins the opportunity to further attempt a score in 5 chances by running from a lining- up position within the outer circle, 54 yards to a connecting zone, without the his hands touching the surface and for each time that they touch an out occurs and after reaching the connecting zone, tells the referee what amount of weight he wants added onto the dazzle bar, that the referee will add if he can run another 16 yards up the field, pass the follow through, on into the safe zone within the allotted 5 chances,
- k. if he can lift the bar with one continuous flick of the wrist, then will be successful in adding to his side's score by the multiple printed below where the horizontal landed, multiplied times the weight the spinner has lifted or if at any time during the spinner's attempt to score, before entering the safe zone locks arms with a teammate for 2 seconds, passes off the opportunity to score to the teammate who then will be as if they were the one who completed a spin.

6) (Canceled) Claim 6) A method of playing a game as described in Claim No. 5 in which all weight placed onto the Dazzle bar, must remain on the Dazzle bar, unless the category "Subtract a weight" appears below where the horizontal stops after a completed spin; and all instructions appearing below the horizontal are as follows:

Free Spin (0 points),

Takc a gucss (12 points),

Wagging a weight, (3 points @ pound)

Add 2 ounces (10 points)

Ante-up Again (0 points) USED FOR OPTIONAL PLAY,

Start Over (0 points) USED FOR OPTIONAL PLAY,

Add a weight (4 points @ ounce) other rules in the method of play include

- a. a game divided into two 42 minute halves for adults players and lesser times for younger adults and children,
- b. 15 seconds is given to the runner to enter the lifting area and hoist the bar,
- c. each team is given 3 time outs per half, one 1 minute time out and 2 thirty second time outs,
- d. when games end in a tie, 5 minute sudden death games are played to determine a winner,
- e. during a game play is divided into segments and being designated as the time a team is on offense,
- f. when a player commit a serious infraction that player is sent to a penalty area for a segment, or removed from the game,
- g. for other infractions free spins and free lifts, a reduction in the number of chances left to score and being barred from the inner circle during play segments are utilized,
- h. Optional aspects of the game are qualifying which is selection and performance of athletic feats players perform prior to games that qualify them to play in the contest, and academics which is knowledge players must display before the microphone during the game when the pointer lands on any of the two OPTIONAL PLAY categories, in order for that player, to stay in the game,
- i. players have the 2 minutes to challenge answers given, and if challenger is successful, players giving wrong answers must leave the game or if unsuccessful, challengers must leave the game.

(Canceled) Claim 7) A game as described within Claim 5 and Claim 6 players must utilize the elongated molded diamond shaped object termed horizontal, that measures 18 1/4" overall in length by 6 1/2" abreast where widest and 1 3/4" in depth, covered with 1/4 inch cloth inserted neoprene rubber, hand covered, stitched at the seams, at least one full revolution, that is located within an inner circle at its center, on a mound atop and anchored, by the through structural means of a perforation, item 20 Figure 2-A, for die cast bolt, item 13 Figure 2-A, thereto pressed through said perforation also cast with an upper end containing surface thread and slotted containing item 22-A, cast there for retainer 22 shown in Figure 3, a means to secure a

horizontal, item 31 Figure 3, to the top of the said mound centered within an inner circle, centered with an outer circle, where said mound securing mechanism attachments are;

- a. plating of metal or industrial strength heavy duty plastic molded rectangular and cast having four perforations therein for fastening the structure and structural means for
- b. an upright post of metal or industrial strength heavy duty plastic to be standardized in height of lower length for children and youth, and up to 42 inches in length for adults, cast with passageways between 2 1/2 to 12 inches inward of each end for
- c. fastening said upright to said plating by means of one cast high pressure tapering aluminum bolt at its bottom, placing shown on item 9 Figure 1-A, and to fasten said upright at its top, passageway item 16 and bolt item 17 Figure 2, via another cast high pressure tapering aluminum bolt for the attachment of one main section consisting of
- d. 5 layers of supreme absorbent spongy form cushion or other super absorbent soft cloth or cushiony matter 1 1/2 " thick that's 8 sided in designed measuring 21 1/2" by 24" on it broadest ends made with 4 perforations, for the fitting of cloth inserted disc on top and bottom, pre cut so its perforations align for fastening said layers and said rubber disc symmetrically to the perforated disc shaped precast steel mounting bracket, item 26 Figure 2-A, measuring 4 and 6 inches for youth and 8 inches in diameter for adult assemblies, precast having a 5/8 inch passageway, item 25 Figure 2, fastening this main section with said upright and said layers which comprise said main section are covered with 1/8 inch precut cloth inserted neoprene rubber, vinyl, form or cloth and
- e. said main section which contains said mounting bracket containing perforated bore, item 20 Figure 2-1, allows a game as described within Claim 5 and Claim 6 where players must utilize elongated molded diamond shaped object termed said horizontal, that measures 18 1/4" overall in length by 6 1/2" abreast where widest and 1 3/4" in depth, covered with 1/4 inch cloth inserted neoprene rubber, hand covered, stitched at the seams, at least one full revolution, that is located within an inner circle at its center, on a mound to be fastened atop and anchored, by structural means of said perforation, for said for die cast bolt for said pressing through perforation to said cast with an upper end containing said surface thread and said slot containing item 22-A, for said retention in Figure 3, as a means for securing said horizontal and said mound said centered within said inner circle,

said centered within said outer circle, where said mound securing mechanism attachments via said plating and said plating perforations complete an attachment means for said fastening of said structural means for said horizontal.

(Canceled) Claim 8) A game as described in Claim 7 where said main section which contains said mounting bracket containing perforated bore, item 20 Figure 2-1, is a means for playing a game as described in Claim 5 and Claim 6 of which players must utilize an elongated molded diamond shaped object termed said horizontal, that measures 18 1/4" overall in length by 6 1/2" abreast where widest and 1 3/4" in depth, covered with 1/4 inch cloth inserted neoprene rubber, hand covered, stitched at the seams, at least one full revolution, that is located within an inner circle at its center, on a mound to be fastened atop and anchored, by structural means of said perforation, for said die cast bolt for said pressing through perforation to said cast with an upper end containing said surface thread and said slot containing item 22-A, for said retention in Figure 3, as the means of securing the said horizontal and said mound said centered within said inner circle, said centered within said outer circle, where said mound securing mechanism attachments via said plating and said plating perforations complete an attachment means for said fastening of the said structural means for the said horizontal, and when players must use an alternative means to fasten the said main section, said main section includes:

- a. one supreme absorbent spongy form cushion or other super absorbent soft cloth or cushiony matter 57 " in depth that's 8 sided in designed measuring 21 1/2" by 24" on it broadest ends cast with vacant center core 14" square made with 8 extrusions, Figure 2 - B, fitted by pressing extrusions, item 14 - A Figure 2 - B into pre cast molded main section bottom ply intrusion, item 18 Figure 2 - B, which includes omission of shaft, item 15 Figure 2, now one piece section system, items 18 and 18 - A Figure 2 - B, machine pressed together anchor able through reinforce eyelets, item 11 -C Figure 2 - B molded into surfacing flap, item 11 - A Figure 2 - B.
